R Markdown

Evan Scribe, for CDS-102-204

Lab 1, 2/8/2022

This is the end of the first paragraph.

This starts the next paragraph. However, putting a line right below it will not start a new paragraph.

When you surround text with one-star pairs it becomes italicized

When you surround text with two-star pairs, it becomes bolded

When you surround text with three-star pairs it becomes both bolded and italicized

1. Start typing this list. Note there are two spaces between the period and the word "Start".
2. Type the second line of the list
3. If I type step 3 as another step 1 it ignores it and still puts it as step 3.

- This star creates a bullet point on the list.
- Visually, it's similar to the numbered list.

1. What happens if we nest a list?
    1. Type four spaces, then type the number
    2. This did what I expected.
2. What if we contine the numbers this way?
    - If we indent using stars it becomes a bullet point
    - Let's add another one for good measure.
        - We can get another level of nesting!

This serves as a hyperlink!
